

VIRAT PALIWAL

QA ENGINEER

PROFESSIONAL SUMMARY

A skilled QA Engineer with 1+ years of experience in manual and automation testing, ensuring the delivery of high-quality software solutions. Proficient in analyzing requirements, creating test plans, and developing automated scripts for efficient and thorough testing processes. Expertise in both functional and non-functional testing, with hands-on experience in tools like Selenium, JIRA, and Postman. Strong collaborative skills to work with developers and stakeholders to achieve project goals and enhance product quality.

WORK HISTORY

QA Engineer, 12/2024 to Current
Softogrid Solutions Private Limited

- Analyze business requirements, user stories, and functional specifications to define test scope
- Prepare, review, and execute **test plans, test cases, and test scenarios**
- Perform **manual testing** including functional, regression, system, integration, smoke, sanity, and UAT testing
- Identify, log, prioritize, and track defects using tools like **JIRA** and ensure timely closure
- Develop, maintain, and execute **automation test scripts** using tools such as **Selenium / Cypress**
- Select suitable test cases for automation and maintain regression automation suites
- Execute automated test runs and analyze results to identify failures and root causes
- Collaborate closely with developers, product owners, and business analysts in an **Agile/Scrum environment**
- Participate in sprint planning, daily stand-ups, sprint reviews, and retrospectives
- Perform cross-browser and compatibility testing across different devices and platforms
- Support release activities and conduct post-deployment validation testing
- Mentor junior QA team members and contribute to continuous improvement of testing processes

PROJECTS

• **KOGAN** -

Kogan is the last ecommerce site on the list, with just less than 10 million visitors per month. The Kogan website is best known for selling high-
